

QlikView for Greentree

“Cost-effective Business Intelligence at your fingertips!”

Key Benefits

- Responsive to Your Needs
- Custom Dashboards & Scorecards
- Integrated Business Wide
- Multiple Deployment Options
- Flexible Analysis
- Tailored Applications
- Powerful 360 Degree Reporting

Businesses thrive on access to and the quality of, their data. QlikView for Greentree will gather and analyse data for the purpose of helping enterprise users adapt and make better business decisions. Effectively the organization is energised and empowered by having a comprehensive knowledge of all of the factors that affect the business.

With QlikView for Greentree you will be provided with an in depth knowledge (KPI's) about factors such as your customers, competitors, suppliers, economic environment, and internal operations. Business Intelligence of this calibre drives performance and provides a source for competitive advantage.

“Very, very responsive!”

“The implementation of Greentree and Qlikview has made us information rich”

Fiona Ludemann, Office Manager - Ivoclar Vivadent

Responsive:

Greentree customers are able to deploy QlikView quickly and easily. Getting running in days not weeks means you not only get early benefits from empowering information but you also save money on consulting/training fees and precious time.

Integrated:

QlikView for Greentree combines and collates data from Greentree and other internal or external systems—seamlessly. This advanced level of integration means your analysis and reporting is completely accurate, focused and altogether meaningful.

Flexible:

There’s no, “how do we make it fit?” or “do we need to re-engineer? QlikView for Greentree is configured and scales to your individual business needs. The result is answers to questions and solutions to challenges, not more problems.

Custom Dashboards & Scorecards:

Dashboards and scorecards can be fully customised, with full drill-down to the transaction level.

Powerful Reporting:

The powerful reporting features allow you to combine and distribute data from multiple sources quickly and easily.

Deployment Options:

The deployment options enable you to deploy QlikView for Greentree over the web or via thin clients for remote users.

Tailored Applications:

Applications have been tailored especially for your Greentree environment.

What Qlikview for Greentree means for YOU...

As business professionals you know that customers are your most important asset, but also that profits are gained and lost in business details. QlikView for Greentree allows you to understand both. Effectively the whole organisation is enabled!
